WANTS.

Advertisements under this head, 6 lines (42 words) or less, one time, \$1.00

FOR SALE.

FOR SALE—NICE GREEN-HOUSE. Most fashionable part of the city. Sell at a bargain. Cost to run it per month \$100, including \$42 rent. Receipts will average \$300 per month, and can be increased. Good reasons for selling. Address W. B. LEEDY & CO., Birmingham, Ala.

FOR SALE—82 Acres of land adjoining town plat of Hays City, Kansas. 50 acres in Orchard and Nursery. Buildings alone cost \$1,000.00. Can be advantageously used to follow up the business already established, or might be converted into a health resort, or a splendid house for one doing business in town. For particulars, address MARTIN ALLEN, Hays City, Kansas.

FOR SALE—FRUIT FARM near Albion; 120 acres; 10 bearing. 30 acres planted in Apple, Peach and Pear. Well improved; good new house; plenty of water; great fruit country. Price \$5,000; will be worth twice that in a short time. Address JAMES DAWES, Albion, Ill.

HUNTSVILLE FEMALE COLLEGE,

HUNTSVILLE, ALA. Forty-fourth Session begins Wednesday, September 6, 1893. Healthy, well furnished, twenty Officers and Teachers. All departments of Female Education thoroughly taught; Music, Art, Languages, Sciences, Literature and Commercial Course. A Christian home for pupils. Charges reasonable For Catalogues, etc., apply to

Types in Peaches.

(Continued from April Number.)

CHINESE TYPE—CHINESE CLING STRAIN.

The Chinese Type is very distinct from the Persian Type in tree and fruit and its choice of climate. It embraces the Chinese Cling strain, the Honey strain and the Peen To strain. Including these several strains, the territory to which the Chinese Type is best adapted may be stated in a general way to be that lying between the Ohio river and the Southern limits of the United States. The Chinese Cling strain occupies the northern portion of this territory, flourishes well as far South as Palatka, Florida, and Galveston, Texas, but succeeds best somewhere between the extreme limits named. In favored locations it sometimes thrives and bears well further North or further South. The trees and the fruit buds are less hardy than some of the varieties of the Persian Type. The color of the fruit is white or cream colored, usually with a bright crimson blush. The skin is rather tender for shipping long distances; but with careful handling some of the varieties have proven very profitable. The Family Favorite, a freestone, is considered the most profitable for market or family use of any of the well tested varieties of this strain. The Sneed, lately brought to notice, is claimed to be earlier than Alexander and the testimony from various sources leads us to believe the claim is well established. The varieties belonging to this strain are Sneed, Family Favorite, Chinese Cling, Chinese Free, Thurber, Gen. Lee, Stonewall Jackson, Bell, Mamie Ross, Burke, Carpenter's Cling and Pallas. Ex-

cepting the Sneed, the difference in the season of ripening is very slight. This strain is especially valuable for planting further South than is practicable for the Persian Type, which as a rule does not succeed well South of latitude 30 degrees.

The color of the bark and the leaves of the trees in the nursery, in the growing season, have a tinge of whitish green. Flowers large. Both clingstone and freestone. Flavor not equal in quality to the best varieties of the Persian Type.

W. F. H.

(TO BE CONTINUED.)

10,000 Copies.

This issue of the August number of the PRACTICAL NURSERYMAN exceeds 10,000 copies. It goes to all the Nurserymen, Florists and Seedsmen in the United States, Canada, and to the leading firms in foreign countries. It is the best advertising medium of its class, and the examination of our advertising pages will show a list of leading names in the horticultural world. Call upon them first if you wish anything in their lines, and please favor us then in mentioning the PRACTICAL NURSERYMAN.

Society of American Florists.

The ninth annual meeting of the Society of American Florists will be held at St. Louis, Mo., August 9, 10 and 11, 1893, in the Exposition Building, corner of 14th and Olive streets. All the important car lines pass within a square of the building. The meeting will be held in the Entertainment Hall and the trade display will be made in the rooms and corridors surrounding the hall. The hall is in the northwest corner of the building and is reached from the 14th street entrance.

The World's Horticultural Congress.

The programme of the World's Horticultural Congress will be sent to all who desire a copy. Address Secretary World's Congress Auxiliary. Home Insurance Building, Chicago, or J. C. Vaughan, Chairman Local Committee, Chicago. The session begins August 16th, continuing four days. It is hoped all horticulturists of the world will so arrange their visit to the World's Fair as to be present at this date. Nurserymen, florists, seedsmen and others will hold separate sessions.

Early Harvest Pear.

RICHMOND, VA., July 8th, 1893.

MR. W. F. HEIKES:

DEAR SIR:—I send you by mail to-day a box with four pears, two each of Muscadel and Early Harvest, which I wish you will test and let me know if you do not think that they are the same, and if the Early Harvest is the same as yours. The Muscadel has been grown near Richmond for about 50 years. There has never been any blight on any of the trees, and while the fruit is of poor quality, it will always sell for good prices—has been sold for \$13 per bushel in our market,—and has sold for three dollars per bushel this week, and our market is full of peaches and plums. The pears I send you came out of the same orchard. The Muscadel from trees planted eight years ago and the Early Harvest from trees planted five years. I cannot see any difference of the growth of trees in orchard or nursery. In referring to Downing I find Muscadelle given as synonym of Belle de Bruxelles. It seems to me that description is correct for Early Harvest and that we are pushing an old variety under a new flag.

Yours truly,

W. T. HOOD.

We feel sure that the pears marked Early Harvest and Muscadel are identical, and the same as the variety we are cultivating under the name of Early Harvest. The Early Harvest pear has been a favorite of ours for many years as a profitable market fruit.—EDITOR.

THE HUNTSVILLE WHOLESALE NURSERIES PRICE LIST.

Running the Tree Digger.

Our illustration this month shows the Tree Digger at the Huntsville Wholesale Nurseries, just as it is turning to enter a new row of trees. It will be seen that there are sixteen mules hitched to the digger, and that there are seven riders and one driver and six attendants. It has been found by experience that a less number of mules are unable to endure the work day after day, and keep up a steady, continued pull. Some idea of the magnitude of these nurseries may be conceived, when it is known that this digger team put in 75 days' time last Fall and Winter and ran 451 miles. Without the tree digger the existence of this immense establishment, which now covers nearly 800 acres actually planted in nursery stock, would be impossible.

Grading and Marking Trees.

Nurserymen visiting the World's Fair are invited to call and see the exhibit of the Huntsville Wholesale Nurseries, Huntsville, Ala., showing their new system of grading and marking trees. This exhibit will be found in the extreme North wing of the Horticultural Building. Mr. Heikes expects to be with the exhibit during August.

Fall Planting.

Primarily and principally because the spring planting season is generally of such short duration that much intended work is necessarily omitted. In the fall there is abundance of time to plan and to plant, and the work can therefore be done far more satisfactorily.

The once prevalent notion that fall planting is not advantageous, has proved to be erroneous, and with the exception of evergreens, almost everything called hardy can be planted successfully in the autumn.

We recommend and urge fall planting wherever it is possible.

In some regions where the winters are extremely severe, or in exposed situations, spring planting is necessary.—Ellwanger & Barry.

Unsolicited Commendation.

CALIFORNIA, March 25th, '93.

With Certificate of Inspection for Insects Pests

other Wise the trees Will Not be admitted in to this State or if they do arrive & any Pests found, on them, they will be condemned.

OCONTO, WIS., March 30th, 1893.—The Botan have done remarkably well. All alive this spring and full of blossom buds, and stood this winter 30 degrees below zero—the coldest winter we ever had. So they must be hardy.

LELAND STANFORD, JR., UNIVERSITY, PALO ALTO, CAL., Feb. 24, 1893.—I find not only the reading matter but the advertisements of the PRACTICAL NURSERYMAN of peculiar interest, and have made arrangements to order quite a bit of supply material from some of them. I hope to receive all the copies and thank you very much for remembering me.

MARYLAND, Feb. 8th, 1893.—All the trees I have got of you in the last eight years have done well.

ILLINOIS, April 1st, 1893.—Box of trees arrived in fine order. Trees all No. I. It is a pleasure to handle such stock.

COLORADO, June 10th, 1893.—I am setting as fast as I can the last trees you sent me. I have one row of Dwf. Duchess one mile long, and no man ever saw a straighter and nicer looking row of fruit trees anywhere than this row.

MISSOURI, April 5th, 1893.—The trees came to hand safely and are very fine, and in the finest possible condition.

ILLINOIS, May 15th, 1893.—My trees are doing well. I am well satisfied with my trading with you.

IOWA, April 3rd, 1893.—The trees arrived on the 1st inst. in excellent condition. You beat the world on cherry trees.

HEIKES--HUNTSVILLE--TREES.

The first name to think of when you wish to order fruit trees is **W. F. HEIKES**, Manager of the **HUNTSVILLE WHOLESALE NURSERIES, HUNTSVILLE, Alabama**. He is the leader in the Wholesale Nursery business, and has the disposition and the ability to serve you better, everything considered, than anyone else. Our nurseries have been established here many years, and have earned a high reputation for the quality of stock produced and the perfect manner in which it is handled. It usually happens, when an old nursery has been successful, that new ones are started. There is now a new nursery here called the Alabama Nursery Co., with which we have no connection. The name Alabama as applied to this nursery has led to confusion in the minds of some correspondents, who have ordered trees from them, thinking they were ordering from us.

We wish to advise our customers and friends not to confound the **HUNTSVILLE WHOLESALE NURSERIES**, which is the only strictly wholesale nursery in the South, with any other nursery here.

HEIKES--HUNTSVILLE--TREES.

FORGED STEEL NURSERY DIBBLES.

OUR NEW NO. 3 "D" HANDLE DIBBLE.

Made according to pattern given us by one of Rochester's leading nurserymen, and is proving to be a great favorite. We can furnish it also with the "S" handle if preferred. We forge these tools from best English steel. They are just thick enough to be of sufficient strength, tapering to a good point and thin edges, which are ground sharp; the entire blade being polished.

Length of Blade, 13 inches.

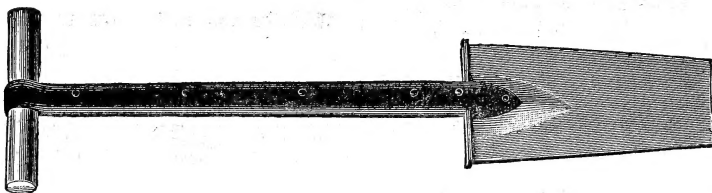

Width of Blade, 2 inches at widest point.

Weight, 1 1/4 lbs.

Price, \$1.25 each.

Our complete Illustrated Catalogue of Nursery Tools and Supplies mailed on application.

[81]

In the Genuine Smith Grubber we claim the most perfect machine ever invented for pulling trees, stumps, cleaning timber-land, moving buildings, and for work where a windlass is necessary.

We claim that in proper use the machine will pay for itself in a week; inexperienced hands have averaged one-half acre a day in close timber with this machine; it practically does away with the labor of ten men; trees are pulled out of the ground more rapidly than two men can chop them down; it requires but one minute to pull a tree six and seven inches through!

More than 5,000 of these machines have been sold since the first patent was issued, in 1882. No purchaser has ever entered a complaint. We challenge such! Our machine is a pronounced success.

W. SMITH & CO., Mystic, Iowa
